Feature-for-Feature the Finest Drywall Ripping Tool in the World!

Pro, Semi-Pro Ripping Tool...

The EZRip from the EZRip Drywall Tool Company combines measuring, marking and ripping into one quick and easy operation. It features a telescopic design, engineered for super-fast drywall ripping with convenient storage for 10 additional drywall blades. The EZRip vastly improves the efficiency of drywall cutting, completely eliminating traditional training time, making your workday easier, faster, and more cost-effective.

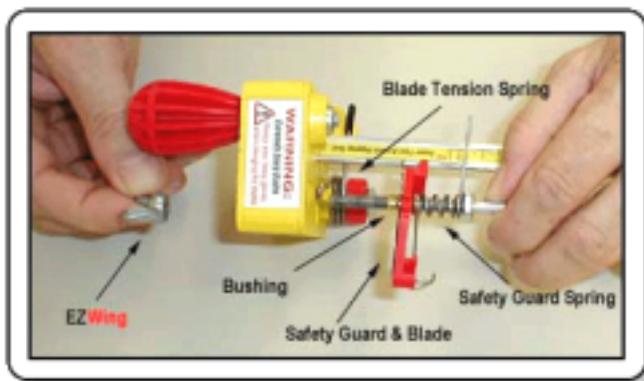

EZRip Makes Scoring Drywall Easy!

With the EZRip you can choose from four scales, allowing you to measure off the amount you keep or the amount you cut. Once the measurement has been set, the EZRip can be quickly drawn across the drywall panel for a clean, accurate cut.

The EZRip is lightweight and compact with a physical measuring surface of only 2 feet; yet it incredibly rips drywall with mathematical precision up to 12 feet. The use of EZRip is not strictly reserved for drywall professionals, general contractors, and skilled carpenters. It can also round out the preferred toolbox of the homeowner and "do-it-yourselfer," by aiding in the most ambitious remodeling job.

EXCLUSIVELY made in the USA to control the highest quality standards

Try Changing the Blade with EZWing.... (Just Remove the Wing Nut!)

- 1** Simply, untension the legs of both springs at the spring post and safety guard.
- 2** Remove the wing nut and slide the guide rod, safety guard, and spring away from the handle.
- 3** Remove safety guard, bushing, and blade. Install new blade and assemble in reverse order.

You're ready to go back to work... in seconds
